

Metropolis Newsletter # 4

Campus News

The Metropolis Project is soliciting proposals for research funding (please distribute widely).

A 2-page description of the work to be conducted, along with a budget that should not exceed USD 40,000, should be sent to metronews@princeton.edu before November 15, 2019. We expect to be able to support 2 or 3 projects. Particularly encouraged are requests to develop, apply, and integrate new technologies that can make metropolises more resilient, sustainable, livable and equitable, as well as requests to support workshops aimed at planning large external proposal development. The scope of the work should be limited to 1 year.

The Cities Equad News from SEAS communication office is now [online](#). It surveys technologies developed by Princeton researchers for "the wired city", "the sustainable city", "the built city", "the livable city" and "the moving city". It also features an overview of the metropolis project vision.

Princeton campus to reduce [its carbon footprint to zero by 2046](#), while [Copenhagen aims to accomplish that by 2025](#).

National and International News

The city trying to make urban living good for your health - BBC Future

If you live in Glasgow, you are more likely to die young. Men there die a full seven years earlier than their counterparts in other UK cities. Until recently, the causes of this excess mortality ...
